DETAILED ACTION

Applicants' arguments, filed 25 March 2002, have been fully considered by they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims Rejections-35 USC 112

Claim 1 remains rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant does not address the issue of including an initial step in claim 1 of administering a tracer dose of a radiopharmaceutical, collecting data as to its clearance, and using that to establish the optimally effective dose. This rejection is still maintained.

Claims Rejections-35 USC 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24, 83 and 84 remain rejected under 35 U.S.C. 102(b) as being anticipated by Wahl et al. (WO 96/34632 A1). Applicant asserts that the instant invention is distinguishable from Wahl et al. because a clearance profile is established to determine the optimally effective

Art Unit: 1631

patient-specific therapeutic dose. However, Wahl et al. absolutely considers the clearance profile in the invention of WO 96/34632 A1. Page 5, lines 6-17 clearly explains the importance of determining the rate of clearance or disappearance of radioactivity from a patient. This step determines changes in the radiation concentration of a particular patient over a given period of time, clearly meeting the limitations of claim 1.

Claim 19 remains rejected under 35 U.S.C. 102(b) as being anticipated by Order (I.J. Radiation Oncology Bio. Phys. (1980) vol.6, pp.703-710; PTO-1449 reference D11). As stated in the previous office action, Order teaches a therapeutically effective dose of a radiopharmaceutical in a **patient** and demonstrates the optimal therapy of intrahepatic malignancies with radiolabelled antibodies.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
